The Mercury 13 Martha Ackmann 2003-06-03
For readers of The Astronaut Wives Club, The Mercury 13 reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America's first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the

Mercury 7 astronauts, but they were summarily dismissed by the boys' club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so small

she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.

Regulation and Entry into Telecommunications Markets Paul de Bijl 2003-01-09 This book analyses telecommunications markets from early to mature competition, filling the gap between the existing economic literature on competition and the real-life application of theory to policy. Paul De Bijl and Martin Peitz focus on both the transitory and the persistent asymmetries between telephone companies, investigating the extent to which access price and retail price regulation stimulate both short- and long-term competition. They explore and compare various settings, such as non-linear versus linear

pricing, facilities-based versus unbundling-based or carrier-select-based competition, non-segmented versus segmented markets. On the basis of their analysis, De Bijl and Peitz then formulate guidelines for policy. This book is a valuable resource for academics, regulators and telecommunications professionals. It is accompanied by simulation programs devised by the authors both to establish and to illustrate their results.

The New Yorkers Cathleen Schine 2009-09-01 A New York Times Book Review Editors' Choice Inspired by her account in *The New Yorker* of adopting a profoundly troubled dog named Buster, acclaimed author Cathleen Schine's *The New Yorkers* is a brilliantly funny story of love, longing, and overcoming the shyness that leashes us. On a quiet little block near Central Park, five lonely New Yorkers find one another, compelled to meet by their canine companions. Over the course of four seasons, they emerge from their apartments, in snow, rain, or glorious

sunshine to make friends and sometimes fall in love. A love letter to a city full of surprises, *The New Yorkers* is an enchanting comedy of manners (with dogs!) from one of our most treasured writers.

Ulysses and Us Declan Kiberd 2010-06-03 In *Ulysses and Us*, Declan Kiberd argues that James Joyce's *Ulysses* offers a humane vision of a more tolerant and decent life under the dreadful pressures of the modern world. As much a guide to contemporary life as it is virtuoso work of literary criticism, *Ulysses and Us* offers revolutionary insights to the scholar and the first-time reader alike. Leopold Bloom, the half-Jewish Irishman who is the hero of James Joyce's *Ulysses*, teaches the young Stephen Dedalus (modelled on Joyce himself) how he can grow and mature as an artist and an adult human being. Bloom has learned to live with contradictions, with anxiety and sexual jealousy, and with the rudeness and racism of the people he encounters in the city streets, and

in his apparently banal way sees deeper than any of them. He embodies an intensely ordinary kind of wisdom, Kiberd argues, and in this way offers us a model for living well, in the tradition of the literature upon which Joyce drew in writing *Ulysses*, such as Homer, Dante and the Bible. 'Declan Kiberd's brilliantly informed and highly entertaining advocacy liberates Joyce's greatest book from the dungeon of unreadable masterpieces.' Joseph O'Connor

The Future of the Past Alexander Stille

2003-04-01 An engrossing look at the cultural consequences of technological change and globalization Space radar, infrared photography, carbon dating, DNA analysis, microfilm, digital data bases—we have better technology than ever for studying and preserving the past. And yet the by-products of technology threaten to destroy—in one or two generations—monuments, works of art, and ways of life that have survived thousands of years of hardship and war. This paradox is central to our age. We use the

Internet to access and assess infinite amounts of information—but understand less and less of its historical context. Globalization may eventually benefit countries around the world; it will also, almost certainly, lead to the disappearance of hundreds of regional dialects, languages, and whole societies. In *The Future of the Past*, Alexander Stille takes us on a tour of the past as it exists today and weighs its prospects for tomorrow, from China to Somalia to Washington, D.C. Through incisive portraits of their protagonists, he describes high-tech struggles to save the Great Sphinx and the Ganges; efforts to preserve Latin within the Vatican; the digital glut inside the National Archives, which may have lost more information in the information age than ever before; an oral culture threatened by a "new" technology: writing itself. Wherever it takes him, Stille explores not just the past, but our ideas about the past, how they are changing—and how they will have to change if our past is to have a future.

The Book of Dreams Federico Fellini 2008 The revered creator of such films as *La Dolce Vita* and *La Strada* presents a personal diary of his private visions and nighttime fantasies as depicted through a series of notebook sketches, in a volume that offers insight into his creative vision and penchant for bizarre imagery.

The Vale of Soulmaking Meg Harris Williams 2018-03-29 The post-Kleinian model of the mind, as developed by W. R. Bion and Donald Meltzer, is essentially an aesthetic one. It is founded on Melanie Klein's discovery of the "internal object" with its combined masculine and feminine qualities and ambiguous, awe-inspiring nature. Turbulent emotional experiences are repeatedly transformed through symbol-formation, on the basis of the internal relationship between the infant self and its object; and the aesthetic containment provided by this "counter-transference dream" (as Meltzer put it) enables the mind to digest its conflicts and develop. This search for a pattern that can make "contrary"

emotions thinkable is modelled by all art forms and accounts for their universal significance. It is a process that can be observed particularly clearly in literature, in the form of the romance between the poet and his Muse (the traditional formulation of the psycho-analytic internal object).

Menswear of the Lombards. Reflections in the light of archeology, iconography and written sources Yuri Godino 2016-12-26 Often considered to be "the most barbaric among barbarian populations", the Lombards actually boast one of the most prosperous and complex civilizations of the Migration Period, able to bequeath refined cultural and artistic treasures, as well as enchanting crafts. This paper aims at focusing on menswear, a cornerstone of the Lombard culture which used to be an essential expression of status for the German societies. The main goal is to offer a consistent and useful summary of the historical data, providing the reader with an up-to-date bibliographic support

and a series of reconstructive interpretations, both encouraging a critical approach to the subject and helping the work of mostly any meticulous re-enactor. Textile materials, colors and clothing are described using documentary, archaeological and iconographic sources from the Lombard kingdom in Italy, comparing them with the evidence pertaining to Germanic Europe and the neighboring Mediterranean world. In addition, the author revisits the currently known theories on the spatha suspension belt, a basic element of the armed man equipment.

The Libation-Bearers Aeschylus 2015-08-24
Aeschylus was the first of the three ancient Greek tragedians whose plays can still be read or performed, the others being Sophocles and Euripides. He is often described as the father of tragedy: our knowledge of the genre begins with his work and our understanding of earlier tragedies is largely based on inferences from his surviving plays. Only seven of his estimated seventy to ninety plays have survived into modern times. Fragments of some other plays have survived in quotes and more continue to be discovered on Egyptian papyrus, often giving us surprising insights into his work.

Historical Dictionary of Italian Cinema Gino Moliterno 2008 "Italian cinema is regarded as one of the great pillars of world cinema. Films like *Ladri di biciclette* (1948), *La dolce vita* (1960), and *Nuovo cinema Paradiso* (1988) attracted unprecedented international acclaim and a reputation, which only continue to grow. Italian cinema has produced such acting legends as Sophia Loren and Roberto Benigni, as well as world-renowned filmmakers like Federico Fellini, Sergio Leone, Mario Bava, Dario Argento, and Lina Wertmuller, the first woman to ever be nominated for the Best Director award." "The Historical Dictionary of Italian Cinema provides a better understanding of the role Italian cinema has played in film history through a chronology, an introductory essay, a bibliography, appendixes, black--white photos, and hundreds of cross-referenced dictionary entries on actors, actresses, movies, producers, organizations, awards, film credits, and terminology."--BOOK JACKET.

Science in the Kitchen and the Art of Eating Well
Pellegrino Artusi 2003-12-27 First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor - humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not

merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

The She-Pope Peter Stanford 1999 THE EXTRAORDINARY STORY OF THE ENGLISH WOMAN WHO FOOLED THE VATICAN. The legend of Pope Joan - the woman who, dressed as a man, headed the Catholic church in the early ninth century - has always been a subject of fascinated speculation but rarely, until now, the subject of serious research. As the future over women in the catholic priesthood continues, and the Church, which once took her story as gospel, now tries to play down the rumours, it is time for a reappraisal. Here Peter

Stanford, author of The Devil- A Biography, reveals what can, and cannot, be known of this incredible story, and of the extraordinary woman behind it. In this fascinating account, ranging from secret histories to conspiracy theories, medieval carvings to tarot cards, women priests to cross-dressing clerics, and from romantic fiction to hard facts, he delivers a major study of historical detective work.

The Lady in the Looking Glass Virginia Woolf
2011-02-15 'People should not leave looking-glasses hanging in their rooms any more than they should leave open cheque books or letters confessing some hideous crime.' 'If she concealed so much and knew so much one must prize her open with the first tool that came to hand - the imagination.' Virginia Woolf's writing tested the boundaries of modern fiction, exploring the depths of human consciousness and creating a new language of sensation and thought. Sometimes impressionistic, sometimes experimental, sometimes brutally cruel, sometimes surprisingly warm and funny, these five stories describe love lost, friendships formed

and lives questioned. This book includes *The Lady in the Looking Glass*, *A Society*, *The Mark on the Wall*, *Solid Objects* and *Lappin and Lapinova*.

Undressing Cinema Stella Bruzzi 2012-10-12
From Audrey Hepburn in Givenchy, to sharp-suited gangsters in Tarantino movies, clothing is central to film. In *Undressing Cinema*, Stella Bruzzi explores how far from being mere accessories, clothes are key elements in the construction of cinematic identities, and she proposes new and dynamic links between cinema, fashion and costume history, gender, queer theory and psychoanalysis. Bruzzi uses case studies drawn from contemporary popular cinema to reassess established ideas about costume and fashion in cinema, and to challenge conventional interpretations of how masculinity and femininity are constructed through clothing. Her wide-ranging study encompasses: * haute couture in film and the rise of the movie fashion designer, from Givenchy to Gaultier * the eroticism of period costume in films such as *The Piano* and *The Age of Innocence* * clothing the

modern femme fatale in *Single White Female*, *Disclosure* and *The Last Seduction* * generic male chic in *Goodfellas*, *Reservoir Dogs*, and *Leon* * pride, costume and masculinity in 'Blaxploitation' films, *Boyz n The Hood* and *New Jack City* * drag and gender confusion in cinema, from the unerotic cross-dressing of *Mrs Doubtfire* to the eroticised ambiguity of *Orlando*.

The Book of Disquiet Fernando Pessoa
2010-12-09 Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do? Because he would have to do something. And what suit would he wear? Because he would

have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and the humdrum reality of his life, *The Book of Disquiet* is a classic of existentialist literature.

Town and Revolution Anatole Kopp 1970-01-01

Erica Baum: Dog Ear Erica Baum 2016-06-01

The concept of Dog Ear is simple and straightforward: dog-eared pages of mass-market paperbacks are photographed to isolate the small diagonally bisected squares or rectangles of text. The photographs are formally quite neutral and sedate - cursorily reminiscent

of Alber's Homage to the Square" series of prints, paintings and tapestries - but the text also demands attention and it is what allows or coaxes the viewer to linger. In his introduction to the book, Kenneth Goldsmith asks: "Do we see them or do we read them? If we choose to read them, how should we read? Across the fold? Through it? Around it? If we choose to look at Baum's pictures, how should we see them? As artistic photographs? Documentation? Text art?" 25 full color images; with essays by Kenneth Goldsmith and Beatrice Gross. This is the second edition.

Post-Digital Print Alessandro Ludovico 2019-04-23 Digital technology is now a normal

part of everyday life. The mutation of music and film into bits and bytes, downloads and streams is now taken for granted. For the world of book and magazine publishing however, this transformation has only just begun. Still, the vision of this transformation is far from new. For more than a century now, avant-garde artists, activists and technologists have been anticipating the development of networked and electronic publishing. Although in hindsight the reports of the death of paper were greatly exaggerated, electronic publishing has now certainly become a reality. How will the analog and the digital coexist in the post-digital age of publishing? How will they transition, mix and cross over? In this book, Alessandro Ludovico rereads the history of the avant-garde arts as a prehistory of cutting through the so-called dichotomy between paper and electronics. Ludovico is the editor and publisher of Neural, a magazine for critical digital culture and media arts. For more than 20 years now, he has been

working at the cutting edge (and the outer fringes) of both print publishing and politically engaged digital art.
